

JAPANESE STYLE HIGHBALLS

What is a Highball? A simple drink in which a spirit is lengthened with carbonation. Additional ingredients may be present, but they are not essential to the form.

Our Japanese-Style Highballs are prepared with a Hoshizaki highball machine, which produces carbonation far beyond that of your average highball. The unusually fine, intense effervescence creates a colder, crisper, more lifted drink—sharpening texture, carrying aroma, and making even the simplest combination feel remarkably vivid and refreshing.

Classic Highball [8]
